

Confined Space and Gas Detection Refresher

Refresh your knowledge and technical skills to effectively plan, observe and safely enter a confined space.

**SAFETY'
ACTION**

**AXIOM
TRAINING**

Capacity

12 attendees

Duration

Half Day (4 Hours)

Locations

At our local training centre
At your own site or workplace

Overview

This refresher course will provide you with up to date skills and knowledge, as an entrant or observer, to identify the types of confined spaces and hazards and risks associated with working in a confined space. It will also reinforce your understanding of atmospheric testing and equipment required to establish a planned and safe entry, as well as the correct emergency procedures in the event of a rescue.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course. If you did not complete your original training with Safety 'n' Action then we may require evidence of competency

Course Content

- ✓ Identify hazards and controls within confined spaces
- ✓ Develop an emergency procedure plan for a confined space
- ✓ Complete required documentation for a confined space entry
- ✓ Demonstrate knowledge of confined spaces and their permit notification and implementation requirements
- ✓ Demonstrate knowledge of monitoring and confined space testing requirements
- ✓ Describe the responsibilities and duties of people entering; or conducting observation duties for a confined space
- ✓ Demonstrate knowledge of atmospheric testing in potentially hazardous environments
- ✓ Conduct atmospheric tests and interpret and respond to atmospheric testing results

Refreshed Unit Standards

- UNIT 17599** Plan a confined space entry
- UNIT 18426** Demonstrate knowledge of hazards associated with confined spaces
- UNIT 25510** Operate an atmospheric testing device to determine a suitable atmosphere exists to work safely
