

Breathing Apparatus Operational

**SAFETY^N
ACTION**

**AXIOM
TRAINING**

Use self-contained breathing apparatus to undertake operational duties in potentially harmful environments, such as ammonia, waste water or other hazardous atmospheres.

Capacity

8 attendees

Duration

8 Hours

Locations

At our local training centre
At your own site or workplace

Overview

This course will enable you to build certainty and confidence in the use of breathing apparatus equipment.

It is essential that anyone required to wear breathing apparatus understands the physiology of respiration, the different types of apparatus, how they function and all the relevant procedures.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course. This course is both physically and psychologically demanding. Some medical conditions will preclude attendance. A physical readiness questionnaire must be completed as part of the booking process. Facial hair must be shaved.

Course Content

- ✓ Gain an understanding of the relevant Acts, legislation and supporting documentation applicable to the safe operation of breathing apparatus
- ✓ Understand the physiology of respiration and how to ensure the correct breathing apparatus is used to undertake the task
- ✓ Understand the processes required to correctly check, maintain and operate the equipment in a non-rescue situation
- ✓ Understand how to identify and manage risks and hazards associated to the use of self-contained breathing apparatus and hazardous environments

Unit Standards

UNIT 25044 Wear and operate compressed air breathing apparatus in the workplace
