

Open Space Mower Operation

**SAFETY^N
ACTION**

**AXIOM
TRAINING**

It can be customised to suit specific machinery, working environments and company protocols.

Capacity

10 Attendees

Duration

8-16 Hours

Locations

At our local training centre
At your own site or workplace

Overview

This course teaches how to select and prepare mowing equipment and machinery, carry out worksite preparation and safety checks, operate a mower to mow reserves and roadside vegetation and carry out post-operational procedures.

This course is based on coaching and assessment only and is designed for trainees with experience in crawler crane operation.

Prerequisites

Must have a driver licence and any driver licence endorsement appropriate for the machine or vehicle being used (Usually a Wheels, Tracks or Rollers endorsement).

Must hold the unit standards relevant for the trainee's primary machine set up and terrain

Course Content

- ✓ Minimal written theory beyond daily company timesheets, machinery check-sheets, and safety briefings as most of the course is run on-site while production continues
- ✓ The unit standard requires a consistent level of production mowing, balanced with knowledge of mowing plant set-up, machinery operation, and safety
- ✓ Where initial assessment shows consistent competency in some areas, time will be diverted to areas requiring improvement
- ✓ Where attendees are already mowing but wish to gain accreditation (or improve their skills) this course is designed to create as minimal disruption to production as practical. New staff are initially trained then buddied up to gain experience during a longer assessment and improvement phase. This is done in partnership with the relevant company delegate.

Unit Standards

19570 Operate a Mower for Agricultural Contracting
