

Schools Hazard and Risk Management

Prepare yourself for future employment, with a comprehensive understanding of how to identify and assess potential risks and hazards in the workplace

**SAFETYTM
ACTION**

**AXIOM
TRAINING**

Capacity

12 Attendees

Half Day Training

4 Hours

Locations

At our local training centre
At your workplace

Overview

This course will give you the skills to identify the difference between hazards and risks in the workplace or job role and carry out a risk assessment for specific workplace scenarios. You will also learn about the effect of uncontrolled risks and how they can affect not only the workers, but the organisation and the environment as well. In a practical exercise, you will prepare a work method statement and undertake a job safety analysis

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course.

Course Content

- ✓ Demonstrate knowledge of workplace health and safety legislation
- ✓ Ability to identify, control and monitor risks in the workplace
- ✓ Prepare and undertake a job safety analysis
- ✓ Understand how to describe the principles of health and safety risk assessment
- ✓ Application of health and safety risk assessment to a job role in accordance with regulatory requirements and industry good practice

Unit Standards

UNIT 3271 Suppress fire with hand extinguishers and fixed hose reels

UNIT 4647 Explain principles of fire science
