

Bleed Response and Defibrillation

Save lives with your own hands
- learn to stop bleeding and use defibrillators

**SAFETYTM
ACTION**

**AXIOM
TRAINING**

Capacity

12 attendees

Duration

4 Hours

Locations

At our local training centre
At your own site or workplace

Overview

Participants will learn to recognise different types of bleeding, including life-threatening arterial bleeding, and understand the importance of quick action. The course will cover various techniques to control bleeding and the use of emergency bandages and tourniquets. Students will also learn about the signs and symptoms of hypovolemic shock, a potentially fatal condition caused by rapid blood loss.

Prerequisites

Students must be able to kneel on the floor to perform first aid functions and will require use of both hands/arms. If you have students with physical limitations, please contact us to discuss.

Course Content

- ✓ Learn to recognise the different types of bleeding
- ✓ Identifying life-threatening arterial bleeding
- ✓ The importance of quick action
- ✓ Early Defibrillation
- ✓ Defibrillation use
- ✓ Direct pressure techniques on wounds
- ✓ Wound packing, bandages and tourniquets
- ✓ Understand the signs and symptoms of hypovolemic shock
