

Bleed Response & Defibrillation

**SAFETYTM
ACTION**

**AXIOM
TRAINING**

Save lives with your own hands
learn to stop bleeding and use
defibrillators.

Capacity

15 attendees

1/2 Day workshop

4 hours

Locations

At our local training centre
At your own site or workplace

Overview

We are passionate about empowering individuals with life-saving skills and enhancing emergency response capabilities within the communities we serve. Our half day Stop the Bleed & Defibrillation course is designed to equip participants with the essential knowledge and practical skills needed to respond effectively in critical situations.

Prerequisites

Students must be able to kneel on the floor to perform first aid functions and will require use of both hands/arms. If you have students with physical limitations, please contact us to discuss.

Course Content

- ✓ Learn to recognise the different types of bleeding
- ✓ Identifying life-threatening arterial bleeding
- ✓ The importance of quick action
- ✓ Direct pressure techniques on wounds
- ✓ Wound packing, bandages and tourniquets
- ✓ Understand the signs and symptoms of hypovolemic shock
- ✓ Early defibrillation
- ✓ Defibrillation use
