12 Attendees

1 Day Training

8 Hours

Locations

At our local training centre
At your workplace

Overview

This course will give you the knowledge and skills required to effectively assess the level of risk associated with workplace hazards, enabling you to identify and prevent potential illness, injury or incidents in your workplace.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course.

Course Content

- ✓ Understand the rights and responsibilities for workplace health and safety according to the Health and Safety at Work Act 2015
- ✓ Explain the legislative requirements for risk management in the workplace
- ✓ Apply the risk management cycle within your workplace to: identify hazards, assess risks, control the risks, monitor controls and review for continuous improvement
- ✓ Complete any necessary documentation associated with managing risk in the workplace
- ✓ Describe methods used to determine the effectiveness of controls such as audits, statistical analysis, accident and incident registers

Unit Standards

UNIT 30265 Apply health and safety risk assessment to a job role

UNIT 497 Demonstrate knowledge of workplace health and safety requirements
