

Rigging and Slinging (Dogman) Refresher

Refresh your understanding of the requirements set by the Approved Code of Practice for Cranes to operate as a Dogman slinging loads

**SAFETY
ACTION**

**AXIOM
TRAINING**

Capacity
8 attendees

Duration
8 Hours

Locations
Training available nationwide at your own workplace

Overview

This refresher course will reinforce your working knowledge of crane operations that involve lifting varied regular loads and safely directing cranes during operations. Included are a series of practical exercises to reinforce your understanding of Dogman responsibilities and ensure you are up to date with the skills needed for carrying out required duties. The course also covers any relevant regulations and new developments in the crane industry.

Refresher Information:

To remain compliant with Health and Safety legislation and industry 'good practice' guidelines, students are generally required to refresh their training every three years. When booking a refresher course, Safety 'n Action will require evidence of the student's NZQA record of achievement displaying the relevant unit standard/s to the course they are attending. On successful completion of the course the students Go Safe card will be updated and reissued with a new refresher date. (Please note no unit standards will be uploaded to NZQA).

If students are unable to provide us with this information, they will need to attend a full course to gain the unit standard/s. Alternatively, if the student has completed prior training and does not hold the applicable NZQA unit standard/s, on request we can provide the student with an attendance certificate only.

Course Content

- ✓ Refresh knowledge of risk management, hazard control, and rigging planning to slinging regular loads
- ✓ Demonstrate knowledge of the difference between regular loads and irregular loads
- ✓ Demonstrate crane industry communication methods
- ✓ Prepare and sling regular loads, and safely direct a crane during crane operations

Refreshed Unit Standards (if currently held)

- UNIT 3789** Sling varied regular loads and safely direct a crane during crane operations
- UNIT 30072** Demonstrate and apply knowledge of slinging regular loads safely
