At our local training centre
At your own site or workplace

Overview

VOC field assessments are designed to facilitate the ongoing assessment of trained individuals in their workplace environment. Completing these competency assessments ensures that correct procedures are being used in the workplace.

Competency Assessed

The Verification of Competency (VOC) for Wheels, Tracks, and Rollers assesses an operator's ability to safely and effectively handle various special-type vehicles, including those that run on wheels, self-laying tracks, or rollers. Operators will be evaluated on their knowledge of the specific safety and legal requirements for operating these vehicles in workplace settings, as well as on public roads where applicable.

The VOC focuses on verifying that operators can perform the necessary procedures for operating these vehicles while considering the size, weight, and speed limitations of the equipment, as relevant to their license class. Additionally, operators will demonstrate proper handling techniques, safe driving practices, and key considerations to ensure the vehicle is used efficiently and safely within different environments.

Outcome

Upon completion, you will receive a VOC report outlining the trainee's areas of competency and any areas that may require further training or additional VOC checks in the future.
