At your school

Overview

This course will provide you with the manual handling skills to avoid injury in the workplace. You will learn how the back works and practical techniques for reducing the risk of injury. Excessive noise is also a major health issue in the workplace which if not controlled can cause significant hearing damage. During this course you will learn how to manage and control noise, as well as useful methods of hearing protection.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course.

Course Content

- ✓ Identify and describe legislative rights and responsibilities for workplace health and safety
- ✓ Describe the systems approach to workplace health and safety
- ✓ Explain how risks and hazards are defined in the HSWA
- ✓ Able to: prepare a work method statement, and undertake a job safety analysis

Unit Standards

UNIT 497 Apply health and safety risk assessment to a job role

UNIT 19522 Undertake job safety analysis
