Overview

The Truck Driver In Cab Driver Assessment is designed to evaluate a driver's competency in a real-world setting. This on-road assessment allows an experienced assessor to observe the driver's habits, techniques, and adherence to road safety regulations. The assessment covers critical elements such as pre-start checks, engine operation, driving practices, and post-operation procedures, ensuring drivers are not only compliant but performing to a high safety standard.

Competencies Assessed

The Truck Driver In Cab Driver Assessment evaluates several key competencies to ensure the driver is operating in accordance with safe practices, including:

- ✅ Engine Start-Up: Checking that park brakes are applied, the vehicle is in neutral, gauges are normal, and all systems are operating correctly.
- ✅ Moving Off and Driving: Smooth acceleration, correct gear selection, proper clutch use, and maintaining appropriate speeds.
- ✅ Driving Practices: Monitoring road conditions, compliance with road rules, safe cornering, and maintaining safe braking distances.
- ✅ Reversing and Manoeuvring: Safe reversing practices, use of mirrors, and proper vehicle positioning.
- ✅ Parking and Shutdown: Correct parking procedures, applying brakes, and ensuring the engine is safely shut down after allowing time for cooling.
- ✅ Trailer Coupling and Uncoupling: Ensuring proper coupling/uncoupling procedures, checking brakes, and connecting service lines securely.

Outcome

Upon completion, you will receive a Verification of Competency (VOC) report outlining the driver's areas of competency and any areas that may require further training or additional VOC checks in the future.
