Confined Space and Gas Detection

Overview

This course will provide you with the skills and knowledge, as an entrant or observer, to identify the types of confined spaces and hazards and risks associated with working in a confined space. It will also cover the atmospheric testing and equipment required to establish a planned and safe entry, as well as the correct emergency procedures in the event of a rescue.

Prerequisites

Students need to have 3 months of work experience in the industry prior to doing the course.

Course Content

- Identify hazards and controls within confined spaces
- Develop an emergency procedure plan for a confined space
- Complete required documentation for a confined space entry
- Demonstrate knowledge of confined spaces and their permit notification and implementation requirements
- Demonstrate knowledge of monitoring and confined space testing requirements
- Describe the responsibilities and duties of people entering; or conducting observation duties for a confined space
- Demonstrate knowledge of atmospheric testing in potentially hazardous environments
- Conduct atmospheric tests and interpret and respond to atmospheric testing results

Unit Standards

UNIT 17599 Plan a confined space entry

UNIT 18426 Demonstrate knowledge of hazards associated with confined spaces

UNIT 25510 Operate an atmospheric testing device to determine a suitable atmosphere exists to work safely
